

GROWTH MINDSET

TABLE TENTS

rewards for big kids

This method is highly motivating and encouraging for your students to do their best.

As these are growth mindset themed, they are effective at boosting your students' confidence and self-esteem.

These table tents have designs on both sides so that when they are on display they can be seen from both angles.

How wonderful will your students feel having another member of staff or their parents come in the room and see them with this proud achievement on their desks!

You could use these to build camaraderie and a positive classroom community!

Allow your students to hand these out to their classmates when they observe demonstrations of a growth mindset!

These table tents have a unique watercolor design with illustrations that have been created by me specifically for this resource!

You'll save so much time writing personalized notes and there's no need to spend anything on class rewards either!

Encourage your students to have a positive mindset and praise them on their resilience, grit, kindness...

...determination, problem solving skills, creativity, reaching their goals - and so much more!
